

To all members,

We all have heard a great deal about coronavirus (Covid-19) in the news. It is a concern, particularly to people who have traveled to Level 3 countries, been exposed to others with a high risk of exposure to the virus, and higher risk populations based on age or those with immune system issues that are particularly susceptible to the virus. ***Members should make their own decisions about their health and the risks they may face from participating in FPG activities.***

At this point we ask anyone who a) has visited Italy or other Level 3 countries in the past two weeks, or b) has been in contact with a friend or family member who has visited one of those countries or been exposed to the virus – to stay away from FPG functions for at least 14 days after the last exposure.

At FPG and other activities, practice safe distancing. That means to give people some space, avoid shaking hands or hugging others, cover your mouth when you sneeze or cough, and stay away if you are ill.

Once again members should make their own decisions about their health and the risks they may face from participating in FPG activities.
